

Intuit Small Business Growth Council

The Intuit Small Business Growth Council ('the Council') was established to champion economic growth in the UK by ensuring that small businesses are represented in policymaking. The Council comprises 18 small business owners from various industries and backgrounds. They represent Intuit's 10 million small business customers globally and give a voice to the challenges facing the more than 5.6 million small businesses in the UK.

About the 2025 Council

The Council is committed to informing the policymaking process, especially at a time when the UK government is exploring ways to make British small businesses more productive, competitive, and export-driven.

Putting the right support in place to drive small business prosperity will be integral to boosting growth and productivity, as well as delivering the Prime Minister's mission to make the UK the fastest-growing economy in the G7 by 2030.
