

Intuit Small Business Council

The Intuit Small Business Council (“the Council”) consists of small business owners from a variety of industries and backgrounds who represent Intuit’s 10 million small business customers and give a voice to the challenges facing more than 47 million small businesses nationwide.

About the 2025 Council

The 27 members of the 2025 Intuit Small Business Council draw on their experiences starting and scaling companies to influence the policies that impact their businesses most. Intuit and the Council are committed to improving small business success rates, including advocating for policies that help small businesses optimize their cash flow. At a time when the cost of running a business is becoming more expensive, modernizing the payments system to allow more competition is an essential way policymakers can cut costs for American small businesses and help them succeed.
